

Sources for the fixed/carryer oils around the world

This list of lipid oil Sources will help you find lipid oils to work with. It developed from my experience with US suppliers and Lipid Love Facebook group recommendations.

It is a list that will grow as new suppliers appear regularly. In my 20+ years of having a products-based business, I constantly looked for suitable suppliers and developed an intuition when a supplier looked dodgy.

Beware of buying on Amazon, as there are no quality standards on the site. If you know a supplier, their Amazon store will get you free shipping and a product you know.

When using a new supplier, buy oils in small sample sizes first to check if the refinement level is what you are looking for. Some oils are crude and unrefined, while others are entirely refined of the oil's healing fraction. Something midway is ideal.

As oils of all kinds become increasingly popular, unethical people will want to exploit that interest.

I am now adding who NOT to purchase from because they have proven to sell fraudulent products.

You can forward your favorite suppliers to add to this list.

Cautionary Sources - proven unreliable

Nature in Bottle - nearly always at the top of a Google search

Levan Rose (Amazon)

Au Natural Organics (products are ok but their delivery is problematic!)
